## THE ANSWER FOR EVERY CONDITION

The all new GT-AIR II evolves Shoei's premiere full-face helmet line into the most versatile helmet ever made! The GT-AIR II provides advancements in design, functionality and performance that ensure it is capable of adapting perfectly to all of our ever-changing Australian conditions.

Featuring a lengthened internal sun shield for optimal sun-glare protection, an all-new "first position" shield opening for advanced ventilation and defogging, enhanced aerodynamics and noise-reduction technology, and the ability to seamlessly integrate with the all-new Sena SRL2 Communication System, the GT-Air II is equipped to accommodate your every need.

## INTERCOM READY DESIGN

- Evolved design, functionality and performance over its predecessor
- Designed for seamless integration with SENA SRL2 communication system
- Wind tunnel-tested and refined aerodynamics
- Shell-integrated spoiler reduces lift and drag
- Noise-reduction technology reduces unwanted wind and road noise
- New, longer flip-down internal sun shield cuts down on sunlight entering the helmet

**SRL2**

**SENA SRL2**  
P/N 7104904  
RRP \$429.95

## VENTILATION PERFORMANCE

Wind-tunnel optimized to maximize airflow and reduce unwanted noise, the GT-Air II's three (3) intake and five (5) exhaust vents have been strategically shaped and positioned for improved cool air intake and hot air expulsion. A redesigned upper air intake shutter and enlarged lower air intake opening yield greater airflow throughout the entire helmet.

- Redesigned upper air intake shutter draws in more fresh, cooling air
- Enlarged lower air intake opening allows greater airflow into the helmet
- Large upper and lower vent shutters for ease of use with riding gloves
- Three (3) intake and five (5) exhaust vents
- Wind tunnel-optimized to maximize airflow and improve negative air pressure exhaust suction

## AERODYNAMICS & NOISE-REDUCTION

More than just aggressive styling and aesthetics, the GT-Air II's progressive shell shape is compact and uniquely streamlined to reduce air resistance and drag. Improved, airtight window beading and an enhanced internal sun shield system prevent unwanted wind noise inside the helmet.

- Wind tunnel-optimized to strike the perfect balance between airflow and silence
- Compact shell shape with aggressive, streamlined styling
- Improved, airtight window beading prevents unwanted wind noise
- Reduction of unwanted wind and road noise through superior sealing and aerodynamics
- Enhanced internal sun shield system reduces unwanted noise

## VISOR SYSTEMS

The GT-Air II's advanced outer visor system provides a large, distortion-free view, facilitates smooth and easy shield changes, features an all-new "first position" visor opening.

The GT-AIR II also comes equipped with a new lengthened internal sun shield for optimal relief from sun glare in one quick motion.

### CNS-1 OUTER VISOR

Protects from 99% of the sun's damaging UV rays

- 3D injection-molding ensures a distortion-free view throughout entire field of vision
- Comes equipped with Pinlock® EVO fog-resistant system
- CNS-1 visors available separately in LIGHT & DARK TINT as well as SPECTRA BLUE, SILVER AND FIRE ORANGE

### NEW QSV-2 INTERNAL SUN VISOR

- Built-in QSV-2 sun visor is **5mm longer** and gives riders improved, instant relief from sun glare in one quick motion
- Large, easily located switch activates the 3D injection-moulded inner visor
- Distortion-free view blocks 99% of the sun's damaging UV rays
- Forehead area of outer shell is raised slightly to accommodate the internal sun visor, allowing for the integrity of the helmet's inner EPS liner to remain intact

## COMFORT

The GT-Air II is equipped with a fully removable, washable, adjustable, and replaceable 3D Max-Dry Interior System capable of dissipating sweat 2x faster than traditional nylon interiors.

Multi-layer cheek pads for comfort and helmet stabilization along with premium two-tone interior fabric and red stitching accentuate the GT-Air II's unmatched fit and finish.

## 3D MAX-DRY INTERIOR SYSTEM

- Fully removable, washable, replaceable, and adjustable
- Exclusive Max-Dry material absorbs and dissipates sweat 2x faster than traditional nylon
- Three-dimensionally shaped to match the contours of a rider's head
- Multi-layer cheek pads for comfort and helmet stabilization
- Premium two-tone interior fabric and red stitching accentuate the unmatched fit and finish
- Optional interior components available in different sizes for a customizable fit

## SAFETY

Few characteristics of a motorcycle helmet are as critically important as its first and second layers of defence, which is precisely why the GT-Air II features the SHOEI-exclusive Multi-Ply Matrix AIM shell and Multi-Piece/Multi-Density EPS liner.

### MULTI-PLY MATRIX AIM SHELL

- Proprietary technology integrates a multi-ply 5 layer laminated fibre matrix shell
- Hand-laid interwoven layers of fiberglass with organic fibres and resin
- Shell-integrated spoiler with consistent shell thickness guarantees proper strength and weight
- 3 Shell sizes and 4 EPS liner sizes for perfect fit
- ECE 22.05 Certified

### MULTI-PIECE / MULTI-DENSITY EPS LINER

- Provides enhanced impact absorption by utilizing varying densities of foam
- Allows cooling air to travel unrestricted through tunnels created in the EPS
- Precise placement of multi-density EPS material yields a more compact, lightweight design

#### Sizes

GT-AIR II E22/05						
Product size	XS	S	M	L	XL	XXL
Shell size	M			L	XL	
Liner size	S		M	L	XL	
Mask Liner	S		L			
Centerpad size	S13	S9	M9	L9	XL9	XL5
Cheekpad size	39	35	35	35	35	31

## EMERGENCY QUICK RELEASE SYSTEM (E.Q.R.S.)

Shoei's EQRS allows emergency medical personnel to easily and safely remove the cheek pads from an injured rider's helmet.

The helmet can then be gently removed with minimal load placed on the riders' neck

## MICRO RATCHET CHINSTRAP

- Patented 100% stainless steel interlocking mechanism for premium safety
- Quick and smooth closure and opening
- Comfortable and easily-adjustable

## CNS-1 BASE PLATE SYSTEM

- Smooth and easy shield changes
- SHOEI's patented spring-loaded technology ensures a wind and waterproof seal
- Redesigned base plate gear has an all-new "first position" shield opening feature - optimised for advanced venting and defogging without allowing excess wind to distract the rider
- New airtight window beading drains & prevents water from entering helmet

## SRL2

New, custom communication built on 20S technology for the SHOEI GT-Air II

## DESIGNED SPECIFICALLY FOR THE SHOEI GT-Air II

The SRL2 Bluetooth® communication system was jointly created by Sena and SHOEI specifically for the new SHOEI GT-Air II helmet. This low-profile device is essentially undetectable from the outside of the helmet to give you a sleek look. The SRL2 is built with similar functions to our top-selling 20S, has simple 3-button control and comes with updated, detachable microphone options. Pair to your smartphone so you can listen to music, hear GPS directions, talk on the phone and more.

## BEST-IN-CLASS COMMUNICATION EXPERIENCE

Constructed with a dual Bluetooth chips, the SRL2 allows you to communicate with up to 7 other riders over 1.6 km (1 mile) in open terrain. Audio Multitasking™ allows you to simultaneously listen to music and talk with other riders via intercom. The intelligent design will automatically decrease the music volume when someone begins speaking, and then increase again once you have ended your conversation.

## THE FEATURE SET YOU NEED FOR THE BEST RIDE

The SRL2 comes with all the functions you need to have the smoothest ride including group intercom, voice commands and more. Universal Intercom™ makes the SRL2 compatible with other non-Sena Bluetooth communication systems. The SRL2 is also built with Advanced Noise Control™, so whether you're talking over the intercom or taking a phone call, the environmental wind and road noise doesn't interfere with the audio.
